

## GTT receives an order from HD Hyundai Samho for the tank design of two new Ultra Large Ethane Carriers

**Paris, 16 October 2024** - GTT announces that it has received, in the third quarter of 2024, an order from its partner the Korean shipyard HD Hyundai Samho for the tank design of two new Ultra Large Ethane Carriers (ULEC), on behalf of ship-owner Eastern Pacific Shipping.

GTT will design the tanks of these two vessels, which will each offer total capacity of 150,000 m<sup>3</sup>. The tanks will be fitted with the [Mark III](#) membrane containment system developed by GTT.

The containment system has been designed to carry a wide range of liquefied gases from the petrochemical industry, in addition to LNG, allowing broad operational flexibility over the vessel's lifetime.

The delivery of the vessels is scheduled between the second and third quarters of 2027.

### About GTT

GTT is a technology and engineering group with expertise in the design and development of cryogenic membrane containment systems for use in the transport and storage of liquefied gases. Over the past 60 years, the GTT Group has designed and developed, to the highest standards of excellence, some of the most innovative technologies used in LNG carriers, floating terminals, onshore storage tanks and multi-gas carriers. As part of its commitment to building a sustainable world, GTT develops new solutions designed to support ship-owners and energy providers in their journey towards a decarbonised future. As such, the Group offers systems designed to enable commercial vessels to use LNG as fuel, develops cutting-edge digital solutions to enhance vessels' economic and environmental performance, and actively pursues innovation in the field of low-carbon solutions. Through its subsidiary, Elogen, which designs and manufactures proton exchange membrane (PEM) electrolyzers, GTT is also actively involved in the green hydrogen sector.

GTT is listed on Euronext Paris, Compartment A (ISIN FR0011726835 Euronext Paris: GTT) and is notably included in the CAC Next 20, SBF 120, Stoxx Europe 600 and MSCI Small Cap indices.
