

GTT receives an order from HD Hyundai Heavy Industries for the tank design of 17 new LNG Carriers

Paris – 15 November 2023. GTT announces that it has received an order from its partner the Korean shipyard HD Hyundai Heavy Industries for the tank design of 17 new Liquefied Natural Gas Carriers, on behalf of a leading LNG player.

GTT will design the tanks of these 17 vessels, which will each offer a capacity of 174,000 m³. The tanks will be fitted with the [Mark III Flex](#) membrane containment system developed by GTT.

The delivery of the vessels is scheduled between the first quarter of 2027 and the third quarter of 2029.

About GTT

GTT is a technological expert in containment systems with cryogenic membranes used to transport and store liquefied gases. For 60 years, GTT has been designing and providing cutting-edge technologies for a better energy performance, which combine operational efficiency and safety, to equip LNG carriers, floating terminals, land storage, and multi-gas carriers. GTT also develops systems dedicated to the use of LNG as fuel, as well as a full range of services, including digital services in the field of Smart Shipping. The Group is also active in hydrogen through its subsidiary Elogen, which designs and assembles electrolysers notably for the production of green hydrogen.

GTT is listed on Euronext Paris, Compartment A (ISIN FR0011726835 Euronext Paris: GTT) and is notably included in SBF 120, Stoxx Europe 600 and MSCI Small Cap indices.
