

GTT entrusted by HD Hyundai Heavy Industries with the tank design of four new LNG Carriers

Paris – June 6th, 2023. GTT announces that it has received an order from its partner HD Hyundai Heavy Industries for the tank design of four new Liquefied Natural Gas Carriers (LNGC), on behalf of an Asian ship-owner.

GTT will design the tanks of these four vessels, which will each offer a total cargo capacity of 174,000 m³ and will be fitted with the [Mark III Flex](#) membrane containment system, developed by GTT.

The delivery of these vessels is scheduled between the first and third quarters of 2027.

About GTT

GTT is a technological expert in containment systems with cryogenic membranes used to transport and store liquefied gases. For over 50 years, GTT has been designing and providing cutting-edge technologies for a better energy performance, which combine operational efficiency and safety, to equip LNG carriers, floating terminals, land storage, and multi-gas carriers. GTT also develops systems dedicated to the use of LNG as fuel, as well as a full range of services, including digital services in the field of Smart Shipping. The Group is also active in hydrogen through its subsidiary Elogen, which designs and assembles electrolyzers notably for the production of green hydrogen.

GTT is listed on Euronext Paris, Compartment A (ISIN FR0011726835 Euronext Paris: GTT) and is notably included in SBF 120, Stoxx Europe 600 and MSCI Small Cap indices.
