

Ascenz Marorka expands its real-time fleet performance monitoring service with new centre in Singapore

Paris, 3 December 2024 - Ascenz Marorka, the Smart Shipping arm of the GTT Group, announces the launch of its second Real-Time Fleet Performance Monitoring Centre in Singapore. Thanks to this new centre, ship-owners, charterers, and ship managers will benefit from a global support, ensuring seamless operations across time zones.

As the first centre located in France, the Singapore centre brings together a team of maritime experts with extensive knowledge in navigation, meteorology, vessel performance management, as well as LNG and offshore operations. This second facility reinforces Ascenz Marorka's commitment to delivering a comprehensive approach to fleet optimisation, enabling real-time decision-making and swift responses to operational challenges.

Among its key offerings is the advanced Voyage Optimisation solution. Powered by AI-driven ship models and smart navigational algorithms, this technology optimises routes, enhances fuel efficiency, and reduces CO₂ emissions. By integrating operational, regulatory, and environmental considerations, it ensures safe navigation through diverse sea conditions while maximizing operational efficiency.

The centre also supports offshore operations, offering services such as electronic bunkering process monitoring, fuel consumption analysis and energy-saving strategies. These services are designed to enhance operational performance, ensure transparency between the stakeholders and support sustainable development goals.

Anouar Kiassi, Managing Director of Ascenz Marorka, stated: *"The launch of our second Real-Time Fleet Performance Monitoring Centre, in Singapore, just a year after establishing the first one in France, underscores our unwavering commitment to supporting our customers' success by bringing our expertise closer to their key operational hubs."*

About Ascenz Marorka

Ascenz Marorka, GTT Group's Smart Shipping arm, is a leading provider of digital solutions for Smart Ships in the maritime industry, offering one of the most comprehensive, innovative and reliable digital platforms for ship owners and charterers around the world. Ascenz Marorka portfolio comprises solutions for LNG Cargo Management, Electronic Fuel Monitoring, Vessel Performance Management, Emissions Monitoring, Operational and Regulatory Reporting, Weather Routing.

About GTT

GTT is a technology and engineering group with expertise in the design and development of cryogenic membrane containment systems for use in the transport and storage of liquefied gases. Over the past 60 years, the GTT Group has designed and developed, to the highest standards of excellence, some of the most innovative technologies used in LNG carriers, floating terminals, onshore storage tanks and multi-gas carriers. As part of its commitment to building a sustainable world, GTT develops new solutions designed to support ship-owners and energy providers in their journey towards a decarbonised future. As such, the Group offers systems designed to enable commercial vessels to use LNG as fuel, develops cutting-edge digital solutions to enhance vessels' economic and environmental performance, and actively pursues innovation in the field of low-carbon solutions. Through its subsidiary, Elogen, which designs and manufactures proton exchange membrane (PEM) electrolyzers, GTT is also actively involved in the green hydrogen sector.

GTT is listed on Euronext Paris, Compartment A (ISIN FR0011726835 Euronext Paris: GTT) and is notably included in the CAC Next 20, SBF 120, Stoxx Europe 600 and MSCI Small Cap indices.
