

## GTT receives an order from Samsung Heavy Industries for the tank design of 15 new LNG carriers

**Paris – 26 February 2024.** GTT announces that it has received in early 2024 an order from its partner the Korean shipyard Samsung Heavy Industries for the tank design of 15 new Liquefied Natural Gas Carriers (LNGCs) on behalf of a leading LNG player.

GTT will design the tanks of these 15 vessels, which will each offer a capacity of 174,000 m<sup>3</sup>. The tanks will be fitted with the [Mark III Flex](#) membrane containment system developed by GTT.

The delivery of the vessels is scheduled between the fourth quarter of 2026 and the fourth quarter of 2028.

### About GTT

GTT is a technology and engineering group with expertise in the design and development of cryogenic membrane containment systems for use in the transport and storage of liquefied gases. Over the past 60 years, the GTT Group has designed and developed, to the highest standards of excellence, some of the most innovative technologies used in LNG carriers, floating terminals, onshore storage tanks and multi-gas carriers. As part of its commitment to building a sustainable world, GTT develops new solutions designed to support ship-owners and energy providers in their journey towards a decarbonised future. As such, the Group offers systems designed to enable commercial vessels to use LNG as fuel, develops cutting-edge digital solutions to enhance vessels' economic and environmental performance, and actively pursues innovation in the field of zero-carbon solutions. Through its subsidiary, Elogen, which designs and manufactures proton exchange membrane (PEM) electrolysers, GTT is also actively involved in the green hydrogen sector.

GTT is listed on Euronext Paris, Compartment A (ISIN FR0011726835 Euronext Paris: GTT) and is notably included in SBF 120, Stoxx Europe 600 and MSCI Small Cap indices.
