

## Ascenz Marorka obtains Type Approval certification from Bureau Veritas for its advanced ShaPoLi solution

**Paris – 14 September 2023.** Ascenz Marorka<sup>1</sup>, a GTT Group company, announces that it has been granted a Type Approval certification for its ShaPoLi<sup>2</sup> solution by the classification society Bureau Veritas.

The solution helps ship-owners and operators comply with the International Maritime Organisation (IMO) regulations aimed at curbing Green House Gas emissions and reducing ship carbon intensity by 40% by 2030.

This second certification<sup>3</sup> from a major classification society confirms that Ascenz Marorka's ShaPoLi system complies with IMO resolution MEPC 335(76) and can be used on vessels subject to EEXI<sup>4</sup> overridable power limitation.

The solution monitors propeller shaft power and signals an alert in the wheelhouse if it exceeds the EEXI calculated maximum power. The system logs the periods where the limit was exceeded and enables crew to give comments.

The solution can also be connected to the Ascenz Marorka's online platform, therefore providing real-time monitoring and optimization capabilities to users both onboard and ashore.

These different benefits make Ascenz Marorka's ShaPoLi a unique solution on the market.

**Anouar Kiassi, Managing Director of Ascenz Marorka, said:** *"We are very proud of this new recognition from a major classification which contributes to make our innovative ShaPoLi solution accessible to more vessels. Beyond regulatory compliance monitoring, we offer our customers a comprehensive suite of modules to help them reduce their emissions and optimize the performance of their vessels".*

---

<sup>1</sup> The approval has been received by Ascenz Marorka ehf.

<sup>2</sup> ShaPoLi: Shaft Power Limitation.

<sup>3</sup> [See press release published on June 29, 2023 announcing a type approval certification from DNV.](#)

<sup>4</sup> EEXI: Energy Efficiency Existing Ship Index.

**About Ascenz Marorka**

Ascenz Marorka, a GTT Group company, is a leading provider of digital solutions for Smart Ships in the maritime industry, offering the one of the most comprehensive, innovative and reliable digital platforms for ship owners and charterers around the world. Ascenz Marorka portfolio comprises solutions for LNG Cargo Management, Electronic Fuel Monitoring, Vessel Performance Management, Emissions Monitoring, Operational and Regulatory Reporting, Weather Routing...

**About GTT**

GTT is a technological expert in containment systems with cryogenic membranes used to transport and store liquefied gases. For 60 years, GTT has been designing and providing cutting-edge technologies for a better energy performance, which combine operational efficiency and safety, to equip LNG carriers, floating terminals, land storage, and multi-gas carriers. GTT also develops systems dedicated to the use of LNG as fuel, as well as a full range of services, including digital services in the field of Smart Shipping. The Group is also active in hydrogen through its subsidiary Elogen, which designs and assembles electrolyzers notably for the production of green hydrogen.

GTT is listed on Euronext Paris, Compartment A (ISIN FR0011726835 Euronext Paris: GTT) and is notably included in SBF 120, Stoxx Europe 600 and MSCI Small Cap indices.
