Press release

## GTT unveils its new visual identity at the Gastech 2022 Conference

**Paris - September 5<sup>th</sup>, 2022.** The GTT Group, the technological expert in membrane containment systems for the transport and storage of liquefied gases and technological solutions for the energy transition, unveils its new visual identity at the Gastech conference in Milan.

This new identity illustrates the Group's development strategy and its positioning as a player in the energy transition, committed to building a sustainable world. This vision is integrated into GTT's bylaws following the adoption, in 2020, of an far-reaching Mission Statement:

*"Our mission is to design cutting-edge technological solutions for an improved energy efficiency. We bring our passion for innovation and our technical excellence to the service of our customers, in order to meet their transformation challenges both for today and tomorrow. The GTT teams are at the heart of this mission. Committed and united, we are determined to contribute to inventing a sustainable world."*

Technology for a sustainable world

GTT's new visual identity reaffirms the Group's technological leadership and its capacity for innovation, while highlighting its promise of sustainability and its commitments to the energy and climate transition. The new logo was constructed according to a precise grid inspired by the membrane containment technologies developed by GTT. In the form of a power button, the letter G conveys our positive impact on the world and the ongoing digitalization of our sector. The "T" letters are inspired by the shape of a wave. The unique and proprietary typography reflects stability and movement combined, and conveys the solidity, safety, agility and flexibility of our technologies. The color gradient emphasizes the link between the marine world (navy blue) and the climate (azure blue) to signify the role of GTT and its technologies in accelerating the energy transition.

**Philippe Berterottière, Chairman and CEO of GTT, said:** *"For almost 60 years, we have been committed alongside the maritime transport industry to improve their operational performance and to support them in their energy transition.*

*Over the decades, we have conquered new markets, beyond the design of LNG carriers, which is the core of our expertise. We continue to innovate to offer new technologies and new solutions, notably in LNG fuel, Smart Shipping and in the field of green hydrogen with our subsidiary Elogen.*

*The new visual identity of the GTT group reflects our raison d'être, our culture of excellence and our commitment to the high standards and values that have always guided us. Between modernity and continuity, it propels us towards the future."*

#### **About GTT**

GTT is a technological expert in containment systems with cryogenic membranes used to transport and store liquefied gases. For nearly 60 years, GTT has been designing and providing cutting-edge technologies for a better energy performance, which combine operational efficiency and safety, to equip LNG carriers, floating terminals, land storage, and multi-gas carriers. GTT also develops systems dedicated to the use of LNG as fuel, as well as a full range of services, including digital services in the field of Smart Shipping. The Group is also active in hydrogen through its subsidiary Elogen, which designs and assembles electrolyzers notably for the production of green hydrogen.

GTT is listed on Euronext Paris, Compartment A (ISIN FR0011726835 Euronext Paris: GTT) and is notably included in SBF 120, Stoxx Europe 600 and MSCI Small Cap indices.
