

GTT will design the tanks of six new LNG carriers ordered by Hudong-Zhonghua Shipbuilding (Group) Co. Ltd.

Paris – February 2nd, 2022. GTT announces that it has received an order from its partner, the Chinese shipyard Hudong-Zhonghua Shipbuilding (Group) Co. Ltd., for the tank design of six new LNGCs¹.

GTT will design the tanks of these six LNG carriers, with a total LNG tank capacity of 174,000 m³ per ship. Each tank will be fitted with the GTT's membrane containment system .

The delivery of these six vessels will take place between the fourth quarter of 2024 and the third quarter of 2026.

About GTT

GTT is a technological expert in containment systems with cryogenic membranes used to transport and store liquefied gases. For over 50 years, GTT has been designing and providing cutting-edge technologies for a better energy performance, which combine operational efficiency and safety, to equip LNG carriers, floating terminals, land storage, and multi-gas carriers. GTT also develops systems dedicated to the use of LNG as fuel, as well as a full range of services, including digital services in the field of Smart Shipping. The Group is also active in hydrogen through its subsidiary Elogen, which designs and assembles electrolyzers notably for the production of green hydrogen.

GTT is listed on Euronext Paris, Compartment A (ISIN FR0011726835 Euronext Paris: GTT) and is notably included in SBF 120 and MSCI Small Cap indices.
