

GTT entrusted by Samsung Heavy Industries with the tank design for four new LNG Carriers

Paris – October 7th, 2021. GTT announces that it has received, in Q3 2021, an order from its partner the Korean shipyard Samsung Heavy Industries (SHI) for the tank design of four new LNGCs¹ on behalf of an Asian ship-owner.

As part of this order, GTT will design the tanks of the vessels which will each offer a capacity of 174,000 m³. The LNGC tanks will be fitted with the GTT [Mark III Flex](#) membrane containment system.

Deliveries of the vessels are scheduled for the first quarter of 2024.

About GTT

GTT is a technological expert in containment systems with cryogenic membranes used to transport and store liquefied gases. For over 50 years, GTT has been designing and providing cutting-edge technologies for a better energy performance, which combine operational efficiency and safety, to equip LNG carriers, floating terminals, land storage, and multi-gas carriers. GTT also develops systems dedicated to the use of LNG as fuel, as well as a full range of services, including digital services in the field of Smart Shipping. The Group is also active in hydrogen through its subsidiary Elogen, which designs and assembles electrolyzers notably for the production of green hydrogen.

GTT is listed on Euronext Paris, Compartment A (ISIN FR0011726835 Euronext Paris: GTT) and is notably included in SBF 120 and MSCI Small Cap indices.
