

GTT obtains tank design order for a new LNG Carrier from Samsung Heavy Industries

Paris – December 22nd, 2021. GTT announces that it has received an order from its partner the Korean shipyard Samsung Heavy Industries for the tank design of a new LNGC¹.

As part of this order, GTT will design the tanks of the vessel which will offer a capacity of 180,000 m³. The LNGC tanks will be fitted with the GTT [Mark III Flex](#) membrane containment system.

The vessel will be delivered during the second quarter of 2024.

About GTT

GTT is a technological expert in containment systems with cryogenic membranes used to transport and store liquefied gases. For over 50 years, GTT has been designing and providing cutting-edge technologies for a better energy performance, which combine operational efficiency and safety, to equip LNG carriers, floating terminals, land storage, and multi-gas carriers. GTT also develops systems dedicated to the use of LNG as fuel, as well as a full range of services, including digital services in the field of Smart Shipping. The Group is also active in hydrogen through its subsidiary Elogen, which designs and assembles electrolyzers notably for the production of green hydrogen.

GTT is listed on Euronext Paris, Compartment A (ISIN FR0011726835 Euronext Paris: GTT) and is notably included in SBF 120 and MSCI Small Cap indices.
