

Press Release

GTT membrane technology once again selected to equip a 4th FLNG

Paris – June 8, 2017. GTT has received an order from Samsung Heavy Industries (SHI) to equip a new Floating Liquefied Natural Gas unit (FLNG). This new FLNG, with a capacity of 238,700 m³, will integrate 8 LNG tanks equipped with the [Mark III](#) membrane containment system. It will be the second biggest FLNG in the world. The unit will be built at SHI Shipyard, based in South Korea, on behalf of the Oil and Gas company ENI (Eni East Africa SpA) and its delivery is scheduled in 2021. This FLNG will be operated off the coast of Mozambique.

"We are very pleased to be part of this new FLNG project. After the recent delivery of the very first FLNG and the up-coming delivery of the largest FLNG ever built, this award demonstrates GTT technologies are the solution of choice for these offshore LNG units", declared Philippe Berterottière, Chairman and CEO of GTT.

In addition to this new order, the GTT membrane technology has been selected to equip the 3 FLNGs already ordered in the world. These units are being equipped with the [NO96](#) system as well as the [Mark III](#) system.

About GTT

GTT (Gaztransport & Technigaz) is an engineering company expert in containment systems with cryogenic membranes used to transport and store liquefied gas, in particular LNG (Liquefied Natural Gas). For over 50 years, GTT has been maintaining reliable relationships with all stakeholders of the gas industry (shipyards, shipowners, gas companies, terminal operators, classification societies). The company designs and provides technologies which combine operational efficiency and safety, to equip LNG carriers, floating terminals, and multi-gas carriers. GTT also develops solutions dedicated to land storage and to the use of LNG as fuel for the vessel propulsion, as well as a full range of services.

GTT is listed on Euronext Paris, Compartment A (ISIN FR0011726835 Euronext Paris: GTT) and is notably included in SBF 120 and MSCI Small Cap indices.
