

Press release

GTT unveils its mission statement and incorporates it into the company by-laws

Paris – June 16th, 2020. Jointly developed over several months, involving its stakeholders, first and foremost all its employees, the GTT mission statement was 99.99% approved by its shareholders at the company Annual General Meeting on June 2nd. It will therefore be incorporated into GTT's by-laws.

This approach anchors GTT's long-term ambition to meet the challenges of energy transition by developing technologies that are increasingly efficient from an environmental point of view. It is an important step that reaffirms the commitments to social and environmental responsibility that are part of the Company's DNA. Because of the nature of its business, historically linked to LNG, and thanks to the expertise of its employees, GTT is actively contributing to the development of an environmentally friendly maritime world. Inventing more energy-efficient solutions is still today one of the main challenges of its innovation policy.

GTT mission statement

“Our mission is to conceive cutting edge technological solutions for an improved energy efficiency. We bring our passion for innovation and our technical excellence to our customers, in order to meet their transformation challenges both for today and tomorrow.

The GTT teams are the cornerstone of this mission.

Committed and united, we are determined to contribute to building a sustainable world”

“Our main aim is to combine technical success, economic performance and environmental efficiency. Defining our societal and environmental role and the meaning we give to our actions enables GTT's stakeholders, in particular our employees and our shareholders, to be guided by this perspective”, says Philippe Berterottière, Chairman and CEO of GTT.

About GTT

GTT (Gaztransport & Technigaz) is an engineering company expert in containment systems with cryogenic membranes used to transport and store liquefied gas, in particular LNG (Liquefied Natural Gas). For over 50 years, GTT has been maintaining reliable relationships with all stakeholders of the gas industry (shipyards, ship-owners, gas companies, terminal operators, classification societies). The company designs and provides technologies which combine operational efficiency and safety, to equip LNG carriers, floating terminals, and multi-gas carriers. GTT also develops solutions dedicated to land storage and to the use of LNG as fuel for the vessel propulsion, as well as a full range of services.

GTT is listed on Euronext Paris, Compartment A (ISIN FR0011726835 Euronext Paris: GTT) and is notably included in SBF 120 and MSCI Small Cap indices.
