

Press Release

GTT is attending Posidonia exhibition in Athens, 6 - 10 June, 2016

Paris – 6 June 2016. GTT is attending Posidonia exhibition for the second time, in Athens, Greece, from 6 to 10 June 2016. A real meeting point for Greek shipyards and ship-owners, Posidonia is a must-attend key date for all the global players from the world's shipping industry.

When visiting GTT's booth, visitors can discover the latest technologies developed by GTT to meet the requirements of vessels powered by Liquefied Natural Gas (LNG), and designed for the whole related logistics chain. Company experts are on hand to present the technological innovations linked to the use of the LNG as a fuel.

During the exhibition, GTT also presents its full range of services focused on the operational issues experienced by customers throughout a vessel's life cycle. Among these services: SloShield™, a real-time monitoring system of sloshing in the tanks on LNG carriers, LNG Advisor™, a management and monitoring system of LNG boil-off rate, and REACH₄™⁽¹⁾, a refuelling arm for the transfer of LNG to the vessel. Visitors will also be able to discover bespoke training sessions designed for gas officers. Entirely developed by GTT, these training sessions benefit from the 50 years of expertise of the company in the field of LNG.

To find out more about these technologies and services,
visit GTT at Booth 3.525, Hall 3, on 6-10 June 2016.

About GTT

GTT (Gaztransport & Technigaz) is the designer of containment systems with cryogenic membranes used to transport and store liquefied gas, and in particular, LNG (Liquefied Natural Gas). For over 50 years, GTT has designed and offered to its customers technologies which allow them to optimise storage space and reduce the construction and operating costs of ships or tanks equipped with these systems. The liquefied gas market includes several types of vessels: LNG carriers, FSRUs (Floating Storage Regasification Units), FLNGs (Floating Liquefied Natural Gas vessels) and multi-gas carriers (in particular for ethane and LPG). The company also provides solutions dedicated to onshore storage and to the use of LNG as fuel for vessel propulsion (and associated bunkering), as well as a broad range of high added value services for all stakeholders throughout the liquefied gas chain.
