

Press release

GTT to equip two new LNG carrier vessels for DSME

Paris – May 18th, 2017. GTT has received an order from Daewoo Shipbuilding & Marine Engineering (DSME) to equip two LNG carriers with its [NO96 GW](#) containment system. DSME shipyard based in Geoje - South Korea – will build the vessels of 173,400 m³ each, on behalf of a European ship-owner. Deliveries are scheduled in 2019.

This is the first order of LNG carriers from DSME since the beginning of the year. It comes in addition to the order of last February, concerning a floating storage regasification unit also equipped with GTT NO96 technology.

"We are proud of the close relationship we have had with DSME for over 30 years, which has led to this new order. With 103 vessels in service and 49 in order at present, DSME is indeed a faithful user of our NO96 solutions", declared Philippe Berterottière, Chairman and CEO of GTT.

With almost 150 vessels in service worldwide equipped with the NO96 system, GTT designs are based on sea-proven technology which enjoys unparalleled feedback from actual use at sea. For more than 50 years, the NO range has been evolving thanks to a permanent research and development effort in new technologies, to meet the safety and the efficiency requirements of ship-owners and shipyards. NO96 GW is one of these latest NO developments which enables LNG cargo boil-off gas optimisation.

About GTT

GTT (Gaztransport & Technigaz) is an engineering company expert in containment systems with cryogenic membranes used to transport and store liquefied gas, in particular LNG (Liquefied Natural Gas). For over 50 years, GTT has been maintaining reliable relationships with all stakeholders of the gas industry (shipyards, ship-owners, gas companies, terminal operators, classification societies). The company designs and provides technologies which combine operational efficiency and safety, to equip LNG carriers, floating terminals, and multi-gas carriers. GTT also develops solutions dedicated to land storage and to the use of LNG as fuel for the vessel propulsion, as well as a full range of services.

GTT is listed on Euronext Paris, Compartment A (ISIN FR0011726835 Euronext Paris: GTT) and is notably included in SBF 120 and MSCI Small Cap indices.
