

Press Release

GTT to design the LNG tanks of a new LNG carrier for a Korean shipyard

Paris – January 3, 2018. GTT received at the end of 2017 an order from a South Korean shipyard regarding the design of the LNG tanks of a new LNG carrier. Its delivery is scheduled for the first quarter of 2020.

GTT will design the LNG tanks of the unit, allowing for a capacity of 174,000 m³. The insulation solution [Mark III Flex](#) has been chosen for its ability to reduce the daily guaranteed Boil-Off gas rate to 0.085% of tank volume. 48 vessels in service already benefit from this technology.

The shipowner and shipyard's names are kept confidential at this stage.

About GTT

GTT (Gaztransport & Technigaz) is an engineering company expert in containment systems with cryogenic membranes used to transport and store liquefied gas, in particular LNG (Liquefied Natural Gas). For over 50 years, GTT has been maintaining reliable relationships with all stakeholders of the gas industry (shipyards, shipowners, gas companies, terminal operators, classification societies). The company designs and provides technologies which combine operational efficiency and safety, to equip LNG carriers, floating terminals, and multi-gas carriers. GTT also develops solutions dedicated to land storage and to the use of LNG as fuel for the vessel propulsion, as well as a full range of services.

GTT is listed on Euronext Paris, Compartment A (ISIN FR0011726835 Euronext Paris: GTT) and is notably included in SBF 120 and MSCI Small Cap indices.
