GTT receives its third order of the year for a FSRU

Paris – 28 September. GTT, the world leader in the design of membrane containment systems for the maritime transportation and storage of LNG (Liquefied Natural Gas), announces a new order for a Floating Storage & Regasification Unit (FSRU) from the Korean shipbuilder Samsung Heavy Industries. This new FSRU will be equipped with Mark III technology and is expected to be delivered in 2017.

With this new unit, GTT is recording its third order of the year for a FSRU. As of today, GTT's order book includes eight of these units, one having been delivered in August. GTT technologies have become the standard in this offshore gas industry segment and offer significant competitive advantages, including optimization of CAPEX/OPEX and LNG storage capacity. All of the new-build FSRUs ordered in the world are equipped with GTT technologies.

Philippe Berterottière, Chairman and CEO of GTT commented: *"We are very satisfied of this new success which confirms that GTT's technologies perfectly fit to this market. This order for a FSRU also demonstrates that new importing countries take interest in LNG year after year"*.

About GTT

GTT (Gaztransport & Technigaz) is the world leader in cryogenic membrane containment systems used for the transport and the storage of LNG (Liquefied Natural Gas). For over 50 years, GTT has offered to its customers technologies which allow them to optimize storage space and reduce the construction and operation costs of ships or tanks equipped with these systems. GTT operates in several sectors: LNGCs (Liquefied Natural Gas Carriers) and VLECs (Very Large Ethane Carriers), Multi-gas carriers, FLNGs (Floating Liquefied Natural Gas units), FSRUs (Floating Storage and Regasification units), onshore storage tanks and the use of LNG as a fuel.

GTT is listed on Euronext Paris, Compartment A (ISIN FR0011726835 Euronext Paris: GTT) and is included in SBF 120 and MSCI Small Cap indices.
