

## **GTT Training equips Teekay training centres with G-Sim LNG Simulator software**

**Paris - 16 June 2016.** GTT Training, the specialist LNG (Liquefied Natural Gas) training and simulation provider, has been recently awarded a contract by Teekay Shipping, a global marine energy leader, to supply the [G-Sim](#) LNG simulator software into their training centres in Glasgow, Manila and Bahrain.

The contract includes the development of a ME-GI propulsion configuration based on the Teekay LNG carriers that have recently entered into service. This new configuration will be in addition to the 16 LNG vessel configurations already available within the G-Sim simulator software.

*“GTT is very pleased to support Teekay in the continuing optimization of their training tools, particularly by providing a simulator that includes the latest propulsion system characteristics to be introduced by the company”,* said Ray Gillett, Director and General Manager of GTT Training.

Used to provide hands-on, real-time training in the processes and procedures that must be followed to undertake and complete any type of LNG cargo related operation, G-Sim provides full simulation of all systems onboard a vessel that are involved in the management and handling of the LNG cargo and maintaining the vessel in a safe condition.

Entirely designed by GTT Training, expert in the behavior of LNG and providing training simulators to the maritime industry, G-Sim is one of the most effective training platforms for training operatives in the handling of LNG.

### **About GTT**

GTT (Gaztransport & Technigaz) is the designer of containment systems with cryogenic membranes used to transport and store liquefied gas, and in particular, LNG (Liquefied Natural Gas). For over 50 years, GTT has designed and offered to its customers technologies which allow them to optimise storage space and reduce the construction and operating costs of ships or tanks equipped with these systems. The liquefied gas market includes several types of vessels: LNG carriers, FSRUs (Floating Storage Regasification Units), FLNGs (Floating Liquefied Natural Gas vessels) and multi-gas carriers (in particular for ethane and LPG). The Company also provides solutions dedicated to onshore storage and to the use of LNG as fuel for vessel propulsion (and associated bunkering), as well as a broad range of high added value services for all stakeholders throughout the liquefied gas chain. GTT is listed on Euronext Paris, Compartment A (ISIN FR0011726835 Euronext Paris: GTT) and is notably included in SBF 120 and MSCI Small Cap indices.

**GTT Training Ltd.** is the UK based subsidiary of GTT, specialized in high-quality, specialist technical training, in all aspects of LNG together with real time simulation and software tools in support of the LNG industry. Learn more on <http://www.gtt-training.co.uk>
