## **GTT rewarded for the quality of its services offering**

**Paris – September 2<sup>nd</sup> 2016.** The 2016 Award for best services offering in the Maritime Transport category was awarded to GTT by the CFI.co (Capital Finance International) financial magazine. The range of services developed by GTT was recognised for its ability to meet the new challenges faced by shipowners.

Competing companies were evaluated based on their best practices in consulting and services and their contribution to the economic dynamics of their market. Services are considered a key aspect of a commercial offering. They guarantee an optimal client relationship by meeting security, quality, trust and cost objectives.

*"GTT is honoured to receive the 2016 Award for best maritime transport services offering from CFI.co. The award is an acknowledgement of the Group's excellence approach initiated by all employees. GTT's objective is to provide shipowners with innovative services which enable them to increase the availability and efficiency of their ships",* said Philippe Berterottière, Chairman and Chief Executive Officer of GTT.

GTT has a close partnership with shipowners. The Group provides a wide range of engineering, consulting, training, maintenance assistance and ship navigation optimisation services throughout the vessel's entire life cycle.

**About GTT**

GTT (Gaztransport & Technigaz) is the designer of containment systems with cryogenic membranes used to transport and store liquefied gas, and in particular, LNG (Liquefied Natural Gas). For over 50 years, GTT has designed and offered to its customers technologies which allow them to optimise storage space and reduce the construction and operating costs of ships or tanks equipped with these systems. The liquefied gas market includes several types of vessels: LNG carriers, FSRUs (Floating Storage Regasification Units), FLNGs (Floating Liquefied Natural Gas vessels) and multi-gas carriers (in particular for ethane and LPG). The company also provides solutions dedicated to onshore storage and to the use of LNG as fuel for vessel propulsion (and associated bunkering), as well as a broad range of high added value services for all stakeholders throughout the liquefied gas chain.
